The power of political discourse in Latin America in 2000s111

Foreword

Spanish Philology at Wszechnica Polska University in Warsaw has been operating for 10 years now. It is still very popular among students who want to get to know this fascinating Spanish-speaking world and gain qualifications and skills to become high-demand professionals – translators, teachers and promoters of culture.

Our didactic mission is to convey multidimensional vision of Spain and Latin America; our academic mission is to promote scientific and cultural research regarding Spanish philology.

This Working Papers edition contains selected texts from academic conferences organized by Spanish Philology in previous years and articles written by academic lecturers Wszechnica Polska University has been actively cooperating with.

Maja Zawierzeniec, PhD, Director of Spanish Philology Department, Wszechnica Polska University in Warsaw
